

Summer Math Practice

Dear Parents,

You've likely heard already about the importance of summer practice, to prevent students from losing their hard earned skills. Holy Rosary School has a long history of a Summer Math Program, to reward students for keeping their skills fresh over the summer. To assist with your child's participation in our summer math program, and to provide summer practice, we are enclosing some suggested summer materials for you to work on with your child.

When he/she returns in the fall, we will administer start of the year assessments in math. We are working hard to better refine our differentiation practices in math, in order to ensure we are meeting students where their needs are and pushing them forward academically. The data from the fall assessment, along with data from the end of the year 3rd grade assessments, will provide us important information to better support your child in 4th grade math. Therefore, we strongly encourage you to help your child complete this packet over the summer, and also that you continue to review multiplication facts with them regularly, to ensure they are ready to hit the ground running when school starts.

In addition to the math packet, the following are books appropriate for HRS students:

- Singapore Math Workbook - Level 2A for Grade 3, \$9.99

Summer Reading Practice

Ms. Corrigan has prepared a summer reading packet and it is attached to this email in the form of a PDF for your convenience. In addition to daily reading, students are encouraged to complete some or all of the included activities that can be printed out at any time--no matter where your summer takes you!!! These activities reinforce skills learned in 3rd grade and will help students feel confident going into 4th grade. As a bonus, special prizes will be awarded to students who complete the packet and return it to Ms. Corrigan the first week of school in September!!

If you have any questions, you can contact Ms. Corrigan at mcorrigan@holynosaryws.org.

Have a wonderful summer!
